

Exit Calm

We're On Our Own

This is the twelfth in a series of singles released by London live night/record label Club AC30. The series is called As & When, and will follow the same general format of limited edition numbered 7" and digital release. The theme is "bands we like" and the frequency is "as & when".

As guitar music seeps into a harangued watered down version of itself courtesy of vacuous copyists and insipid careerists, one name shines through like a sole beacon in the middle of a one-dimensional, smoggy sea.

EXIT CALM are Scott Pemberton (drums), Simon Lindley (bass), Rob Marshall (guitars) and Nicky Smith (vocals). To call them a breath of fresh air would merely be understating their value; quite simply they are the most exciting, invigorating and dare we say it, unique, guitar-based band to emerge from these shores in quite some time.

Having initially formed in the South Yorkshire town of Barnsley back in late 2006, Exit Calm spent the next eighteen months writing and honing their sound. Spring 2008 saw them release their first limited release, live favourite 'Higher Learning' on Club AC30 Records while their euphoric live shows have attracted spates of attention culminating in them being invited as main support on The Music's 'Strength In Numbers' UK tour in June 2008.

Comparisons to date have seen their mesmerising guitar eclipses likened to the early sounds of My Bloody Valentine, Ride, Spiritualized and the elaborate skyscraping voyages of Explosions In The Sky, while the captivating presence of front man Nicky Smith offers an intense aside to their brooding noise that renders them completely unforgettable once seen for the first time.

October 2008 sees the band head out on their biggest ever headline tour to date, while their debut single, 'We're On Our Own', a song which has already been turning more than a few heads both live and on record, is due in the shops on Monday 27th October, again via clubAC30.

Their as-yet untitled debut album is expected to be released in the early part of 2009. It promises to be one of the most important records of the decade...
